21st Century Digital Dermatoscopy

HEINE

∴ HEINE® iC 1

Product Summary

The HEINE iC 1 is a new image capturing device to record clinical and dermatoscopic images for documenting, monitoring and supporting differential diagnosis of melanoma and other skin lesions.

Innovative HEINE LED^{HQ} illumination combined with precision optics provide high resolution and reflex-free images with an Apple iPhone* 5s, 6, 6s or SE. The integrated Toggle Function allows you to easily alternate between polarised and non-polarised views.

LED^{HQ} provides optimal brightness, colour rendering and a lifetime of more than 100,000 hours, which means you will never have to exchange the LED.

*iPhone is a trademark of Apple Inc., registered in the U.S. and other countries.
